-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 22 February 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: \_\_\_\_\_.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-7 are rejected under 35 USC §103(a). This rejection is set forth in the prior Office action mailed on December 02, 2005.

***Response to Arguments***

3. Applicant's arguments filed on February 22, 2006 have been fully considered but they are not persuasive.

Applicants' arguments are not convincing, because the tissue of the combination of references, as cited in the previous action, would inherently have the same properties of the claimed tissue. The embossing as taught by the secondary references would inherently impart the same properties to the paper of the primary reference(s), Chen et al., and Luu et al. Contrary to applicants arguments the examiner has indicated the motivations to combine the references, see paragraph bridging pages 3 and 4 and section 5 of previous office action. The primary references, Chen et al. and Luu et al., teach the embossing of lotioned the tissues, but are silent with respect to the type of embossing, the secondary references, including the admission by

applicants, teach that stretch embossing is a well known embossing process and therefore, functional equivalent to conventional embossing processes. One of skill in the art would have reasonable expectation of success if the embossing of the secondary references were used to emboss the tissue s of the primary reference, see previous action. Moreover, it has been held that “[W]here two equivalents are interchangeable for their desired function, substitution would have been obvious and thus, express suggestion of desirability of the substitution of one for the other is unnecessary.” In re Fout 675 F. 2d 297, 213 USPQ 532 (CCPA 1982); In re Siebentritt, 372 F.2d 566, 152 USPQ 618 (CCPA 1967) and both primary references suggest the embossing of the tissue(s).

As to the transfer of the lotion, one of ordinary skill in the art would have expected similar ratio as claimed. Applicants examples demonstrate that the same claimed ratio of lotion is transferred irrespectively if the tissue is embossed or not, i.e., the data shown on page 9 of the present application, clearly teach that the dynamic transfer is more that double of the static transfer, 21.83% vs. 5.14%. One of ordinary skill in the art would expect at least similar trend if the tissues of the primary references were embossed as suggested by the secondary references.

#### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
